Water for the Way You Live™

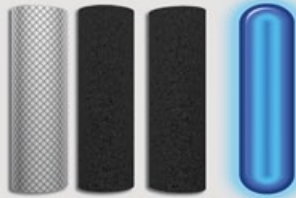

WATER STATION II

Linis™ Water Station II™ point-of-use water purification systems provide pure, delicious, hot and cold drinking water right where you need it. These bottle-less, plumbed-in systems are available as self-contained purification units with installed reverse osmosis or micro filtration systems, or without filtration for quick connection to a Linis™ Water Hub™. Water Station II features inline Ultraviolet (UV) disinfection to provide further protection against waterborne contaminants and bacteria.

Filter Options:

Micro Filtration
1-Micron
3-stage + UV Guard

Reverse Osmosis
100 Gallon per Day
4-stage + UV Guard

Multistage Ceramic
0.5 Micron
4-Stage + UV Guard
